

MRI Scan Dos and Don'ts

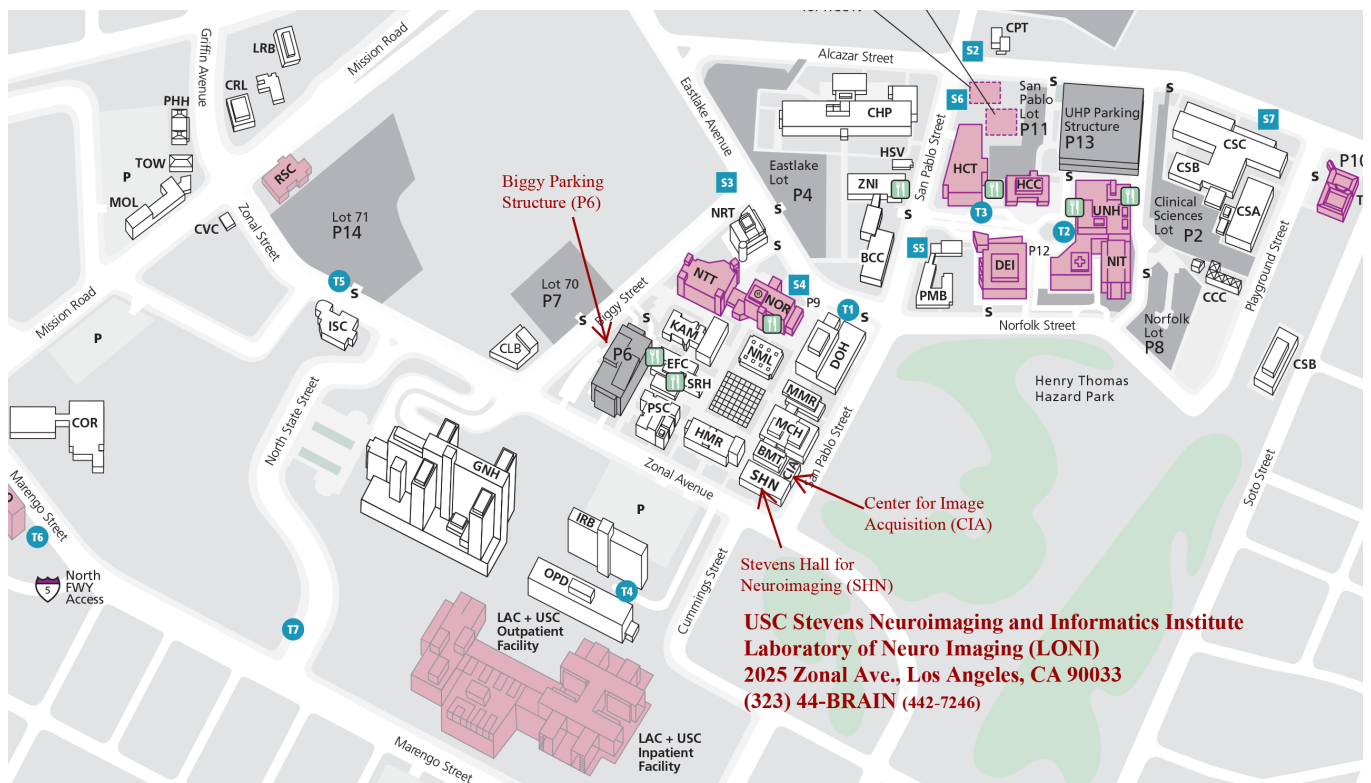

CIA
Center for Image Acquisition

Do:

- Do wear comfortable clothing, free of metal. Sweat pants and t-shirts are fine!
- Do come to your scan rested
- Do bring a companion if it makes you feel more comfortable
- Do pay close attention while the person scanning you goes over the Metal Screening Form

Don't:

- Don't wear eye makeup
- Don't wear clothing that's uncomfortable
- Don't wear clothing that includes metal (including underwire bras)
- Don't drink lots of water or coffee before your scan -- you're going to need to be still for a prolonged period without interruption.
